They Make Addresses to the Voters of This State.

THE SENATOR SPOKE AT BELLAIRE.

He Also Talked at Other Places In That Vicinity -- Bryan Made His Opening Speech at Montpelier-Then He Visited Defiance and Other Points.

Bellaire, Oct. 28.—Senator Hanna put in a busy day campaigning in the industrial towns of Southeastern Ohio vesterday. He made five separate speeches, concluding with an address at the Elysian theater here in the evening. The first meeting was at the Laughlin Tinplate mills, where the senator was told the employes have received an advance in wages ranging from \$4.60 to \$24 a month since the passage of the Dingley law, and which is being enlarged so as to furnish ememployment to 350 additional hands. Senator Hanna was received at the works by a salute from all the whistles. He was greeted with applause by the workmen, and made a speech, in which he appealed for support for the administration and urged the necessity of controlling the general assembly to the end that the gerrymandering of the congressional districts by the Democrats might be prevented, and Ohio might continue to be represented by two Republican senators.

The second meeting was at the Aetna Standard Iron and Steel works. The 2,000 employes of the mill gave him an enthusiastic greeting and there was a large crowd of persons not employed in the mills also present. Senator Hanna made a lengthy speech, in which, in addition to referring to the issues of the campaign, he took occasion to deny the charge that he is a labor crusher, which has teen made against him by the Democratic press. The speech was received with applause.

In the afternoon Mr. Hanna spoke to an audience which filled the Bridgeport opera house and in the evening he addressed another large meeting at the Martin's Ferry opera house. At the conclusion of his Martin's Ferry speech he boarded a train for this place, reaching the theater at 9 o'clock. In beginning his speech Mr. Hanna said:

"I am delighted to stand before so many people of your city. You ali know that I have the reputation of being a labor crusher. Under a protective system we are again receiving the benefits of prosperity from tariff legislation. We told the workingmen we would go further for their interests and also protect them against the pauper labor of Europe. We want protection against those people who are filling their pockets at the expense of

American laborers. "I am told that the great free silver prophet is coming to Ohio the last few days of the present campaign to tell the people that they did not know what they were talking about last year. Bryan said wheat and silver always went hand in hand. Soon after Sept. 1896, they parted company and knocked Mr. Bryan's argument into a cocked hat. Then he set up the cry of class legislation and attempted to array the poor against the rich. I say to you that any man who makes statements tending to incite the people against their fellow men ought to be in the

penitentiary." Somebody in the audience asked "how about the Union Pacific deal?" "Well, my friend," said the senator, "I will tell you all I know about that deal. While Cleveland was in office a syndicate of New Yorkers arranged with the head of the government for

the purchase of the Union Pacific railway, which was purely an executive act and was entirely proper. I knew nothing about it particularly until I was in the senate, when a resolution was offered by Senator Harris of Kansas to postpone the closing of the contract until after the new administration took hold and place the responsibility of closing the deal upon President McKinley. I want the United States to get out of the Union Pacific all they can."

The senator closed with an appeal to the voters to stand by the ticket.

VAN WERT, Oct. 28.—William Jennings Bryan began a short campaigning tour in Ohio yesterday. He traveled in a private car. The first meeting was at Montpelier, where an audience of 5,000 persons, from all parts of the county, had assembled. Mr. Bryan questioned the honesty of the vote of Ohio last year and then took up the silver question. He said:

"I wish to submit some propositions for Republicans to talk about for the Democrats are with us. It is only necessary to talk to Republicans who were wrong last fall, in my judgment.
The gold standard is a bad thing for the United States and we should not submit to it because the financiers of Europe want it."

He said the Republican party up to this time had never declared that the gold standard was a good thing. It promised last year, he said, to do what it could to get rid of the gold standard. He then reviewed the work of the monetary commission which President McKinley sent to Europe, and said its mission had failed because the money changers were opposed to it.
Mr. Bryan attributed the improved

inancial condition of the United States to the discovery of gold in Alaska add to the famine in India, which, he said, the Republicans were rejoicing over, even though the famine reruited in the loss of thousands of lives.

From Montpelier the train was hurried to Defiance, where an afternoon meeting was held. There was a large crowd at the depot as the train arrived in Defiance, and crowds had assembled at the stations a ong the way. An audience of 5,000 people, a majority of whom were Republicans, it is said, listened to the Defiance speech, which did not differ materially from that delivered at Montrelies. livered at Montpelier.

The progress of the train from Defiance to Van Wert was marked by enthusiatic gatherings along the way.

A big crowd had assemed here to meet Mr. Bryan upon his arrival. Several excursion trains had been run, bringing people from the nearby towns. A procession was formed and the distinguished visitor was escorted through the streets to the hotel, being applauded liberally along the way. About 6,000 people attended the meeting in the evening and the remarks of Mr. Bryan were frequently cheered. Mr. Bryan devoted a portion of the opening of his speech to Senator Hanna. He also con. demned government by injunction and favored the arbitration of labor difficulties. Referring to the silver question, he treated it in about the same way he had done at Montpelier. He declared that the gold standard ought to be abolished and bimetallism established. In reference to silver Mr. Eryan said:

The silver cause is stronger today than it ever was. There are more people advocating it; there are more people determined to carry on the fight because the conclusions they formed a year ago have been vindicated by the logic of events."

He made a strong appeal to the voters to stand by their candidates for the legislature, to the end that a Democratic senator might be returned from

Democratic leaders here say the meeting was one of the most enthusiastic ever held in Van Wert, and they count much on the effect of the trip through the three counties in which Mr. Bryan

COWARDLY REVENGE.

Many Railroad Officials and Cit zens Share Depew's Opinion That the New York Central Wreck Was the Result of a Dynamite Explosion.

COLD SPRING, N. Y., Oct. 28.—Chief Detective Humphrey of the New York Central railroad, when asked if the arrest of any person was contemplated on suspicion of having caused the wreck of the State express at Garrisons, admitted that the railroad suspects that the roadbed was blown out by dynamite, but refused to divulge any information.

President Depew's opinion that the disaster was the result of a dynamite explosion, planned by enemies of the corporation, finds many upholders among railway officials and citizens familiar with the conditions.

"If the embankment of the railroad was torn up by dynamite, the motive of those who did it was not robbery, but revenge," was the statement made by one official of the road.

A rigorous investigation is being made and at least one man may be

Twenty-six roadmasters have examined the track, and one who has had

experience with dynamite says it looks very much like that explosive had been used.

The locomotive was found in the river at least 30 feet south of the depression in the track, which makes it seem reasonably certain that the engine leaped the space before it started in its plunge into the mud bottom of the river. It is known that the engineer had shut off his steam and applied the airbrakes to the train before the crash

Three weeks ago this same train, No. 46, had a narrow escape from being wrecked at a point about two miles south of the spot where it finally met it's fate. A huge boulder, weighing two tons. was discovered on the track just in time for the train to be stopped.

"I made the remark that morning that I believed someone put that stone there and I still think so," said a gentleman, who was on the train. "The boulder must have fallen from the top of the mountain for it cleared the inland track in its fall and landed squarely on the down track. It looks to me as though someone bears a grudge against the railroad company, but who it is I cannot say.'

Mrs. Perry was the daughter of Dr. Cotton Mather Smith, president of Kenyon college.

A TRUE DEMOCRAT AND HIS RECORD.

PULLMAN'S SONS DISINHERITED.

Comparatively Small Incomes. Daughters Got Most of Estate.

CHICAGO, Oct. 28 .- The will of the late George M. Pullman, has been filed in the probate court. Norman B. Ream and Robert T. Lincoln are named as executors, his wife not being appointed because of his wish to relieve her from the labors, cares and responsibilities of the position.

The bulk of the estate goes to the two daughters, Mrs. Frank O. Lowden of Chicago and Mrs. Frank Carolan of San Francisco, who receive \$1,000,000 each and also the residuary estate, the amount of which is now unknown except to the executors. The homestead at the corner of Prairie avenue and Eighteenth street, the construction of which cost \$300,000, the jurniture, pictures, etc., is devised to his wife for life, and she is also to receive \$50,000 for the first year and thereafter during her life the income of \$1,250,000.

"Castle Rest," on one of the Thousand Islands is given to his daughter Florence (Mrs. Lowden), with the furniture for life, and \$100,000 to maintain it as a place where the descend-

ants of the testator's parents can visit. The two boys are allowed an income of \$3,000 a year each, as they have failed to show any ability to manage large properties and sums of money.

The brothers, Royal Henry Pullman and John M. Pullman, and the sisters. Helen Pullman West and Emma Pullman Fluhrer, are bequeathed \$50,000 apiece. The sisters are given equal shares in the furniture, pictures, etc., in the Belgravia apartment house in the city of New York.

The wife of his brother, Charles L. Pullman, is given the income of \$25,000; the sum to go to her son,

William Pullman, upon her death. Other bequests are: Florence Sanger, \$20,000; Stuart West, \$5,000; Bertha West, \$5,000; Helen Fluhrer, \$5,000; Lewis Pullman Fluhrer, \$5,000; Mrs. Charles B. Smith, \$5,000; Mrs. Charles H. Eaton, \$10,000; William A. Angell, \$10,000; Silas W. Bretzfield of New York, \$10,000; Charles S. Sweet, \$10,-000, and Miss Maria Louise Orr, \$5,000.

The following amounts were left to faithful employes: Arthur Wells. vators, electric lights and steam hear-\$5,000; William Wells, \$3,000, and ing appartus. The main corridor, William R. Johnson, \$2,000. The which is as elegant as any of the exhousehold servants are to get \$250 to \$500 apiece. Thirteen Chicago charitable institutions are to receive \$10,000

The testator states it was his purpose to found, erect and endow at Pullman, May Have Been Lost in a Mountain Ills., during his life a free school of manual training for the benefit of the children of persons living and employed at Pullman and to expend at apparatus and to provide a fund of \$1,- raging. It is believed that the lives of 000,000 for the maintenance, management and endowment of the school. His executors are directed to set aside \$1,200,000 for this purpose.

The total value of the estate is shown by the petition for letters testamentary and 25 men are engaged in fighting it. to be \$7,600,000. Of this amount \$6. 800,000 is personal property and \$800,-000 realty. Attorney Runnels, who prepared the will, said that these figures are a conservative but fair estimate of the value of the estate.

WILL NOT PUSH SPAIN.

Reasonable Time to Be Given to Carry Out Her Plans.

REPLY DON'T MEET THE ISSUE.

But State Department Officials Says Removal of Weyler and Other Reforms Will Cause This Government to Wait, at Least Until Congress Meets.

WASHINGTON, Oct. 28.-The president now has a summary of the reply of Spain to the note presented by United States Minister Woodford, regarding the war in Cuba, it having been cabled from Madrid.

After due opportunity had been allowed the president to read the message, an application was made for a statement of its contents or nature. This was declined by Secretary Porter, and it was that under no circumstances would the correspondence be made public before consideration by the cabinet.

From unofficial information that has reached certain administration officials in advance of this message of Mr. Woodford's as to the nature of the Spanish reply, it is evident that in neither language nor subject matter is the communication likely to be taken as offensive by our government. It may be, it is true, regarded as insufficient to meet the issue presented by Mr. Woodford in his note, but officials of the state department say that in view of what has already been accomplished by the Spanish cabinet in reforming abuses in Cuba, in removing Weyler and projecting what appears to be a liberal measure of autonomy our government will certainly rest, at least until congress assembles, and afford the new Spanish government a reasonable time to carry out its plans.

SPAIN'S PLAN FOR CUBA.

Minister De Lome Explains the Proposed Scheme of Autonomy.

WASHINGTON, Oct. 26.—The Spanish minister, Senor Dupuy de Lome, has consented for the first time to speak concerning the policy of autonomy which the Spanish government proposes to apply to Cuba.

He says the island will have a system on the lines of those of Canada, or of the American states, maintaining its individuality on all internal affairs and yet retaining its place as a part of the federal system. It will have a viceroy, or governor general, as is always the case in the maintenance of a coloniol system, such as that of Australia, New Zealand or Canada. The island will have its own legislature, chosen directly by the people, who will enjoy universal suffrage.

From the majority in the legislature. the governor general will choose his ministry, consisting of a president of the ministry and four ministers, namely, minister of the interior, minister of public works, minister of public instruction and minister of finance. At the same time Cuba will have representation in the Spanish cortes, as well as her local legislature. The representatives to the cortes will also be elected by the people of Cuba, through universal suffrage, and will not be selected by the ministry, as has been errone-ously stated. The ministry will be responssble to the legislature and not to the governor general. The subjects be-fore the legislature will include those of taxation, tariff, public instruction and all matters of the internal administration of the island, in the broadest sense of this term.

REPLY DON'T MEET THE ISSUE.

But State Department Officials Says Removal of Weyler and Other Reforms Will Cause This Government to Wait, at Least Until Congress Meets.

WASHINGTON, Oct. 28.—The president now has a summary of the reply of Spain to the note presented by United States Minister Woodford, regarding the war in Cuba, it having been cabled from Madrid.

After due opportunity had been allowed the president to read the message, an application was made for a statement of its contents or nature. This was declined by Secretary Porter. and it was that under no circumstances would the correspondence be made public before consideration by the

From unofficial information that has reached certain administration officials in advance of this message of Mr. Woodford's as to the nature of the Spanish reply, it is evident that in neither language nor subject matter is the communication likely to be taken as offensive by our government. It may be, it is true, regarded as insufficient to meet the issue presented by Mr. Woodford in his note, but officials of the state department say that in view of what has already been accomplished by the Spanish cabinet in reforming abuses in Cuba, in removing Weyler and projecting what appears to be a liberal measure of autonomy our government will certainly rest, at least until congress assembles, and afford the new Spanish government a reasonable time to carry out its plans.

SPAIN'S PLAN FOR CUBA.

Minister De Lome Explains the Proposed Scheme of Autonomy.

WASHINGTON, Oct. 26.—The Spanish minister, Senor Dupuy de Lome, has consented for the first time to speak concerning the policy of autonomy which the Spanish government proposes to apply to Cuba.

He says the island will have a system on the lines of those of Canada, or of the American states, maintaining its individuality on all internal affairs and yet retaining its place as a part of the federal system. It will have a viceroy, or governor general, as is always the case in the maintenance of a coloniol system, such as that of Australia, New Zealand or Canada. The island will have its own legislature, chosen directly by the people, who will enjoy universal suffrage.

From the majority in the legislature. the governor general will choose his ministry, consisting of a president of the ministry and four ministers, namely, minister of the interior, minister of public works, minister of public instruction and minister of finance. At the same time Cuba will have representation in the Spanish cortes, as well as her local legislature. The representatives to the cortes will also be elected by the people of Cuba, through universal suffrage, and will not be selected by the ministry, as has been erroneously stated. The ministry will be responssble to the legislature and not to the governor general. The subjects before the legislature will include those of taxation, tariff, public instruction and all matters of the internal administration of the island, in the broadest sense of this term.

[CONTINUED.]

Chariton quietly arose, stepped forward and placed upon the table a large, flat wallet, at sight of which the sergeant's nerves gave way entirely. He made one or two efforts to speak, he struggled as if to rise, his eyes rolled in his head, and in another instant he was slipping helplessly to the floor. A young surgeon sprang to his side as the bystanders strove to lift him, and with one brief glance turned to the court, "Mr. President, this man is in a spasm and should be taken to the hospital."

"Very good, sir," was the calm reply. "Major Edwards, will you see to it that a sentry is posted over him? That man must not be allowed to escape."

Two more witnesses were examined that afternoon, the provost sergeant and Captain Charlton. The former testified that Dawson had been gambling and had lost heavily in the post before pay day: that on that fateful Sunday bill after bill he had seen him pay-over \$100 at the table in the gamblers' tent down below the reservation—before he interfered, warned him of the departure of his troop and ordered him to report in garrison with his horse at once. Donovan had merely been a looker on at the mad game in which the sergeant had sought to recover his losses.

Charlton stated that after his investigation at Red Cloud he was confident that Dawson was the trooper who rode back to the old ranch and that something must be concealed there. Searching it late Sunday night, he found in the dugout a spot where the earth had been recently scooped away, and there in Dawson's old rubber poncho was the wallet with his papers and about \$200 of the missing money or what his men believed to be such.

And then, amid the sympathetic glances of all the court, young Fred told his strange but soldierly story. It was Dawson who asked him to get the chloroform for him at Red Cloud and gave him the folded pencil note, it was Dawson who suggested to him the idea of sleeping down below the bivouac that evening near where Donovan was post ed, and it was Dawson who roused him suddenly and startlingly in the dead of the night. "Up with you, Fred, boy!" he had said. "Up with you, but make lieutenant's just got a courier from Robinson, and he and Sergeant Graham have to write dispatches to go right to the captain at Laramie. You know the whole Platte valley and how to get across and reach the Sidney road 5elow?" Of course he did.

"Then the lieutenant says for God's sake lose not a minute, go for all you're worth, keep well to the west until you cross the Platte and then make for the southeast and warn back everybody who is coming north. He says Mrs. Charlton and the children were to come that way Saturday or Sunday to join the captain at Red Cloud. You can save them if you're in time."

Suddenly roused from sleep, Fred was bewildered for an instant; could only realize that his loved benefactors and friends were in deadly peril and that he was chosen to haste and rescue them. Dawson lifted him into the saddle, pressed some money into his hand to buy food when he reached the settlement or Sidney in case he met no travelers this side, led him to the water's edge and bade him lose not an instant. He never dreamed of harm or wrong or plot until his wounded father told him the foul charge against him after his long and gallant ride that blazing Sun-

Then for a moment the little man broke down and sobbed, and old war worn soldiers in the court turned away with glistening eyes, and the president, rapping on the table, huskily ordered the room to be cleared. Charlton's arms were around his trumpeter's shoulders as he led him to the open air and to his father's bedside. "Cleared!" he said in answer to the longing look in the sergeant's eyes. "Cleared! There isn't a man, woman or child in all the post that doesn't know the verdict and that Dawson is doomed to four years in prison." And then he left them together and alone.

Dawson's trial and confession settled it all. He himself was the thief, who sought in this way to replace the money lost in gambling and to throw upon Fred Waller, should he escape, the burden of the crime. But a merciful God had watched over the boy in his brave and loyal effort, had guided him in safety through a host of savage foes and led him on to honor and vindication in the end. For months there was no happier boy on all the wide frontier than the little hero of the Sidney route, no happier father than brave old Sergeant Waller.

Long years afterward, riding one evening into a cavalry camp on the southern plains, Captain Cross and the turned home yesterday after a visit with writer noted a tall, blue eyed, bronzed shose twirling mus

tache was almost the color of the raded yellow of the chevrons on his sleeve. Despite dust and the rough prairie dress no finer soldier had met their eyes in the long column that went flitting by.

"Who is that young first sergeant?" "That?" answered Cross in surprise. "Don't you know who that is? Why, man, that's Charlton's old Trumpeter Fred."

THE END.

The Magnificence of Queen Bess.

Was Queen Elizabeth shrewish, and as she beautiful? She had long passed her prime when she still flirted and ogled and, antiquated pedant that she was, talked Latin to a Polish embassador. In noticing the bishop of Peterborough's "Queen Elizabeth" The Quarterly Review thus describes the elegances of her times:

"The royal beds were covered with quilts of silk or velvet, shining with gold and silver work or embroidered counterpanes lined with ermine, surmounted by crimson testers or canopies 'most richly ornamented with pearl.' Italian, French and English books were to be had with illustrations of patterns and devices for silk, crewel and lace work. The ladies were adepts in the use of the needle, and many specimens of work of the Tudor period which have come down to us are of the highest order of excellence. Queen Elizabeth and the Countess of Pembroke were noted for their skill in needlework. Among the populace 'straw pellets,' writes Harrison, 'covered onelie with a sheet, under coverlets made of dagswain and good round log under their heads in steed of a bolster,' gave place to mattresses of flock, beds and pillows, which previously 'were thought meet onelie for women in childbed.' Farmers were enabled to buy feather beds and cover them with tapestry. Pewter was taking the place of 'treene platters,' and wooden spoons were being replaced by silver or tin. Glasses became, as Falstaff put it, 'the only drinking,' and Harrison notes the rage among the upper classes for vessels of Venetian glass.

Washable Waists and Dresses.

When a cotton waist is to be frequently washed and if not lined with a piece of the same goods or vith white lawn it should have a yoke, inside or out, of the same fabric, and facing around and under the arm sizes, this being where most of the wear comes. Round waists worn beneath the skirt should extend three inches below. The waist and sleeves should have the French or bag seams, which have the raw edges put together on the right side and a narrow seam taken. Then they are turned to the wrong side and a tiny seam taken, thus hiding all raw edges. If cotton plaids are made upon the bias. they are apt to pull askew in the ironing. In buying embroidery to trim such gowns remember that patterns having small holes wear the best. Such dresses should be washed out quickly and dried in the shade. Do not use strong soap on them. Pique, linen, crash, etc., should be well shrunk before they are made up into waists or dresses. Allowance should be made, for they are apt to shrink.

Always turn down 11/2 inches at the top of wash skirts, which can be let down when necessary. Use two threads half an inch apart in gathering the backs of skirts. Run a worsted braid along the underside of wash dresses. letting the edge barely show, and shrink the braid in boiling water before using it. In sewing ou braid or velveteen hold it, not the skirt next to you. - Emma M. Hooper in L dies' Home Journal.

May Make the Men Hustle-

John I. Platt, editor of the Poughkeepsie Eagle, tells this incident of the recent meeting of the State Press association at the Thousand islands: "One family group that we got acquainted with consisted of two very bright girls. When we asked them whom they were with, one of them replied promptly: We are here by ourselves. I represent the paper, and this is my sister.' We asked what she did on the paper, and she answered: 'Everything that is to be done in a newspaper office. You see, ours is a small office, and I have to set type, run the press, pick up ads., attend the office, report or anything else required - except,' she added after a pause, 'except write editorials. My father and I don't agree in politics, so he won't let me write editorials.'

"There was no doubt whatever, either, of her right or her ability to 'represent the paper, 'and she wasn't the only lady member of the association either. The fact is, we editors of the sterner sex have got to bestir ourselves or these independent women who don't always agree with their fathers in politics, will be crowding us out of our vocation."

[CONTINUED.]

Chariton quietly arose, stepped forward and placed upon the table a large, flat wallet, at sight of which the sergeant's nerves gave way entirely. He made one or two efforts to speak, he struggled as if to rise, his eyes rolled in his head, and in another instant he was slipping helplessly to the floor. A young surgeon sprang to his side as the bystanders strove to lift him, and with one brief glance turned to the court, "Mr. President, this man is in a spasm and should be taken to the hospital."

"Very good, sir," was the calm reply. "Major Edwards, will you see to it that a sentry is posted over him? That man must not be allowed to escape.'

Two more witnesses were examined that afternoon, the provost sergeant and Captain Charlton. The former testified that Dawson had been gambling and had lost heavily in the post before pay day; that on that fateful Sunday bill after bill he had seen him pay-over \$100 at the table in the gamblers' tent down below the reservation-before he interfered, warned him of the departure of his troop and ordered him to report in garrison with his horse at once. Donovan had merely been a looker on at the mad game in which the sergeant had sought to recover his losses.

Charlton stated that after his investigation at Red Cloud he was confident that Dawson was the trooper who rode back to the old ranch and that something must be concealed there. Searching it late Sunday night, he found in the dugout a spot where the earth had been recently scooped away, and there in Dawson's old rubber poncho was the wallet with his papers and about \$200 of the missing money or what his men

believed to be such.

And then, amid the sympathetic glances of all the court, young Fred told his strange but soldierly story. It was Dawson who asked him to get the chloroform for him at Red Cloud and gave him the folded pencil note, it was Dawson who suggested to him the idea of sleeping down below the bivouac that evening near where Donovan was post ed, and it was Dawson who roused him suddenly and startlingly in the dead of the night. "Up with you, Fred, boy!" he had said. "Up with you, but make full, and had someone entered the place no noise. There's the devil's own news. with a match the result would have been | The Indians are out everywhere. The lieutenant's just got a courier from Robinson, and he and Sergeant Graham have to write dispatches to go right to the captain at Laramie. You know the whole Platte valley and how to get across and reach the Sidney road zelow?" Of course he did.

"Then the lieutenant says for God's sake lose not a minute, go for all you're worth, keep well to the west until you cross the Platte and then make for the southeast and warn back everybody who is coming north. He says Mrs. Charlton and the children were to come that way Saturday or Sunday to join the captain at Red Cloud. You can save them if you're in time."

Suddenly roused from sleep, Fred was bewildered for an instant; could only realize that his loved benefactors and friends were in deadly peril and that he was chosen to haste and rescue them. Dawson lifted him into the saddle, pressed some money into his hand to buy food when he reached the settlement or Sidney in case he met no travelers this side, led him to the water's edge and bade him lose not an instant. He never dreamed of harm or wrong or plot until his wounded father told him the foul charge against him after his long and gallant ride that blazing Sun-

Then for a moment the little man broke down and sobbed, and old war worn soldiers in the court turned away with glistening eyes, and the president, rapping on the table, huskily ordered the room to be cleared. Charlton's arms were around his trumpeter's shoulders as he led him to the open air and to his father's bedside. "Cleared!" he said in answer to the longing look in the sergeant's eyes. "Cleared! There isn't a man, woman or child in all the post that doesn't know the verdict and that Dawson is doomed to four years in prison." And then he left them together and alone.

Dawson's trial and confession settled it all. He himself was the thief, who sought in this way to replace the money lost in gambling and to throw upon Fred Waller, should be escape, the burden of the crime. But a merciful God had watched over the boy in his brave and loyal effort, had guided him in safety through a host of savage foes and led him on to honor and vindication in the end. For months there was no happier boy on all the wide frontier than the little hero of the Sidney route, no happier father than brave old Sergeant Waller.

Long years afterward, riding one evening into a cavalry camp on the southern plains, Captain Cross and the turned home yesterday after a visit with writer noted a tall, blue eyed, brouzed coper whose twirling mus

tache was almost the color of the Taged yellow of the chevrons on his sleeve. Despite dust and the rough prairie dress no finer soldier had met their eyes in the long column that went flitting by.

"Who is that young first sergeant?" "That?" answered Cross in surprise. "Don't you know who that is? Why, man, that's Charlton's old Trumpeter

THE END.

The Magnificence of Queen Bess.

Was Queen Elizabeth shrewish, and was she beautiful? She had long passed her prime when she still flirted and ogled and, antiquated pedant that she was, talked Latin to a Polish embassador. In noticing the bishop of Peterborough's "Queen Elizabeth" The Quarterly Review thus describes the elegances of her times:

"The royal beds were covered with quilts of silk or velvet, shining with gold and silver work or embroidered counterpanes lined with ermine, surmounted by crimson testers or canopies most richly ornamented with pearl.' Italian, French and English books were to be had with illustrations of patterns and devices for silk, crewel and lace work. The ladies were adepts in the use of the needle, and many specimens of work of the Tudor period which have come down to us are of the highest order of excellence. Queen Elizabeth and the Countess of Pembroke were noted for their skill in needlework. Among the populace 'straw pellets,' writes Harrison, 'covered onelie with a sheet, under coverlets made of dagswain and a good round log under their heads in steed of a bolster,' gave place to mattresses of flock, beds and pillows, which previously 'were thought meet onelie for women in childbed.' Farmers were enabled to buy feather beds and cover them with tapestry. Pewter was taking the place of 'treene platters,' and wooden spoons were being replaced by silver or tin. Glasses became, as Falstaff put it, 'the only drinking,' and Harrison notes the rage among the upper classes for vessels of Venetian glass.

Washable Waists and Dresses.

When a cotton waist is to be frequently washed and if not lived with a piece of the same goods or with white lawn it should have a yoke, inside or out, of the same fabric, and facing around and under the arm sizes, this being where most of the wear comes. Round waists worn beneath the skirt should extend three inches below. The waist and sleeves should have the French or bag seams, which have the raw edges put together on the right side and a narrow seam taken. Then they are turned to the wrong side and a tiny seam taken, thus hiding all raw edges. If cotton plaids are made upon the bias, ing. In buying embroidery to trim such steady aching pain in the back. gowns remember that patterns having small holes wear the best. Such dresses should be washed out quickly and dried in the shade. Do not use strong soap on them. Pique, linen, crash, etc., should be well shrunk before they are made up into waists or dresses. Allowance should be made, for they are apt to shrink.

Always turn down 11/2 inches at the top of wash skirts, which can be let down when necessary. Use two threads half an inch apart in gathering the backs of skirts. Run a worsted braid along the underside of wash dresses. letting the edge barely show, and shrink the braid in boiling water before using it. In sewing ou braid or velveteen hold it, not the skirt next to you. - Emma M. Hooper in L. dies' Home Journal.

May Make the Men Hustle-

John I. Platt, editor of the Pough keepsie Eagle, tells this incident of the recent meeting of the State Press association at the Thousand islands: "One family group that we got acquainted with consisted of two very bright girls. When we asked them whom they were with, one of them replied promptly: We are here by ourselves. I represent the paper, and this is my sister.' We asked what she did on the paper, and she answered: 'Everything that is to be done in a newspaper office. You see, ours is a small office, and I have to set type, run the press, pick up ads., attend the office, report or anything else required - except,' she added after a pause, 'except write editorials. My father and I don't agree in politics, so he won't let me write editorials.'

"There was no doubt whatever, either, of her right or her ability to 'represent the paper, 'and she wasn't the only lady member of the association either. The fact is, we editors of the sterner sex have got to bestir ourselves or these independent women who don't always agree with their fathers in politics, will be crowding us out of our vocation."

POLL BOOKS MAKE A SHOWING

Which Places the Ticket In a Very Good Notch-Postponed a Hearing-Extending the Pipe Into the River-All the News of Wellsville.

Wellsville Republicans have every reason to feel confident of the result next Tuesday. The poll has been taken and is emmently satisfactory.

The city committee held a meeting last night, and examined the poll books with more than the usual care. The count showed:

The vote is divided as follows .	

Doubtful Republicans..... Doubtful Democrats.....

The last effort of the committee will be made next Saturday night, when the people are asked to assemble at city hall and hear Hon. Chas. B. Galbreath and Hon. R. W. Tayler discuss the issues of the day. The Manley band, of East Liverpool, will render excellent music, and the indications show that there will be a large attendance. Wellsville is supporting the ticket this year.

Out Into the River.

The question of better water has come so prominently before the members of the board that action is now being taken which will be felt by every housekeeper in town.

Superintendent Fogo and a force of men are busy extending the main out into the river. Two sections will be added, reaching 24 feet farther into the channel. When the connections are all made the pipe will be much lower than ever before, and Wellsville can expect to be supplied with much better water.

Many complaints have recently been made regarding the fishy taste of the water, but that is something the department cannot control. It should be remembered the river is very low.

All this while, however, the first vice president had been tugging away at her belt in a businesslike way, and she now produced a small timepiece. "Ladies," she began in a virtuous tone, while all the rest gazed at her with the utmost respect, "let me give you the time. You can always depend upon"- But here she stopped, and after staring at the timepiece for full two seconds she began to shake it and rap it in a manner that might have alarmed any one unfamiliar with women and their ways with watches. The gathering before her, bowever, being of her own sex, took it all most seriously. Suddenly the first vice president put the timepiece to her ear. "Oh," she cried, while a sweet smile of satisfaction irradiated her face, "there's nothing the matter after all. I wound it this morning, but forgot to set it, that's all."-New York Sun.

HER MODEL HUSBAND.

Levity Provoked by Her Reply to the Question of a Spinster.

It was at a woman's luncheon, and they had been exchanging opinions in regard to the husband question, both as a whole and with particulars. By the time ice cream was served the discussion had grown quite heated, and the hostess was beginning to look anxious. At the top of the table the woman in the chiffon vest and her companion in the trimmed gown were at daggers drawn.

"Well, I don't care what any one says, my husband is as good as they make them." said the woman in the chiffon vest excitedly. "He always rocks me to sleep when I have a sick headache, and he gets breakfast when the cook is away, and he always gets up in the night if the baby cries." She glared at the woman in the trimmed gown triumphantly, and she in turn glared back and took up the parable of

"Well, my husband," she remarked, with a strong accent upon the possessive case, "never does any of those things. I should be sorry to see him do any of them. I detest a man who steps over into his wife's province. But he always looks after the furnace, and I never have to worry about the coal bill."

The woman in the chiffon vest smiled disagreeably, and the hostess was about to interpose when the pretty woman at the foot of the table spoke up.

"My husband does all the things you have mentioned," she said sweetly, "and a lot more. When we have no girl, he washes the dishes and sweeps, and I've never had to get dinner once since we've been married. I always Post.

way because he said so little about it. I never had much faith in the men who talk so much. When we were first married, we talked about it, and he spoke beautifully. 'I don't say I'll always do it, Jennie,' he said the first time I was without a girl, 'but I'll always help. And he's been better than his word right along. Last night he even made the porridge, so it would be ready for breakfast this morning, and every morning he brings me a cup of coffee before I get up. "

With the smile of a conscious conqueror, she toyed with her menu card and smiled sweetly at the angry women at the other end of the table. They were speechless, but the woman in the gold rimmed glasses who sat in the middle gave her a keen look and smiled too.

"Something has got to be done for the protection of us poor spinsters," she said merrily, "and if any one else tells a husband story I shall retaliate with a tale regarding a wonderful cat which I possess. But, first, before we quit the subject, let me ask a question. How long," turning to the pretty woman. 'have you been married?"

The pretty woman blushed vividly. "Nearly two weeks," she stammered out timidly. And the other women laughed in the unfeeling manner they so often affect. - Chicago Tribune.

Corset Covers.

The fancy work of the moment of the modish young woman is not with wools or silks or any of the embroidery materials. On her light work basket is piled a tempting array of sheer organdies, bolts of baby ribbon and pieces of onehalf inch wide lace edgings. The organdies are in various delicate shades, with small, indistinct figures, and they are pale blue, pink, cream, green or other tint, which is perfectly matched in the dies are in various delicate shades, with ribbons. From these the busy fingers are fashioning corset covers to be worn under the sheer shirt waists of organdie and batiste which will be included in this same modish young woman's summer outfit. The little slips are cut in three pieces, with seams only under the arms. They are trimmed all around the upper and lower edges and up the front with a narrow beading, finished with an equally parrow lace edge. Through the beading the ribbon runs, and by it they are drawn into a full and pretty fit. They are sleeveless, the armholes edged with the same lace and beading to tie up on the shoulders. The ribbon may be run unbrokenly and tied around the garment to draw it into a bolero effect in front, or it may end at corsage and belt line separately. They are dainty and not unnecessary little confections of summer toilet. - New York Evening

"So did I." thimed in the secretary and the treas arer, while the chairman of the execative committee announced gravely, "Mine was all ready to put on, but I came off in such a hurry that I forgot

it after all." All this while, however, the first vice president had been tugging away at her belt in a businesslike way, and she now produced a small timepiece. "Ladies," she began in a virtuous tone, while all the rest gazed at her with the utmost respect, "let me give you the time. You can always depend upon"- But here she stopped, and after staring at the timepiece for full two seconds she began to shake it and rap it in a manner that might have alarmed any one unfamiliar with women and their ways with watches. The gathering before her, however, being of her own sex, took it all most seriously. Suddenly the first vice president put the timepiece to her ear. "Oh." she cried. while a sweet smile of satisfaction irradiated her face, "there's nothing the matter after all. I wound it this morning, but forgot to set it, that's all."-New York Sun.

IF ONLY THE DREAM ABIDE.

If the things of earth must pass Like the dews upon the grass, Like the mists that break and run At the forward sweep of the sun, I shall be satisfied If only the dreams abide

Nay-I would not be shorn Of gold from the mines of morn I would not be bereft Of the last blue flower in the cleft. Of the haze that haunts the hills. Of the moon that the midnight fills. Still would I know the grace On love's uplifted face And the slow, sweet joy dawn there Under the dusk of her hair.

I pray thee spare me, fate, The woeful, wearying weight Of a heart that feels no pain At the sob of the autumn rain, And takes no breath of glee From the organ surge of the sea-Of a mind where memory broods Over songless solitudes. I shall be satisfied

HER MODEL HUSBAND.

Levity Provoked by Her Reply to the Question of a Spinster.

It was at a woman's luncheon, and they had been exchanging opinions in regard to the husband question, both as a whole and with particulars. By the time ice cream was served the discussion had grown quite heated, and the hostess was beginning to look anxious. At the top of the table the woman in the chiffon vest and her companion in the trimmed gown were at daggers

"Well, I don't care what any one says, my husband is as good as they make them." said the woman in the chiffon vest excitedly. "He always rocks me to sleep when I have a sick headache, and he gets breakfast when the cook is away, and he always gets up in the night if the baby cries." She glared at the woman in the trimmed gown triumphantly, and she in turn glared back and took up the parable of

"Well, my husband," she remarked. with a strong accent upon the possessive case, "never does any of those things. I should be sorry to see him do any of them. knew he was going to be lovely that way because he said so little about it. I never had much faith in the men who talk so much. When we were first married, we talked about it, and he spoke beautifully. 'I don't say I'll always do it, Jennie,' he said the first time I was without a girl, 'but I'll always help. And he's been better than his word right along. Last night he even made the porridge, so it would be ready for breakfast this morning, and every morning he brings me a cup of coffee before I get up.'

With the smile of a conscious conqueror, she toyed with her menu card and smiled sweetly at the angry women at the other end of the table. They were speechless, but the woman in the gold rimmed glasses who sat in the middle gave her a keen look and smiled too.

'Something has got to be done for the protection of us poor spinsters," she said merrily, "and if any one else tells a husband story I shall retaliate with a tale regarding a wonderful cat which

Corset Covers.

The fancy work of the moment of the modish young woman is not with wools or silks or any of the embroidery materials. On her light work basket is piled a tempting array of sheer organdies, bolts of baby ribbon and pieces of onehalf inch wide lace edgings. The organdies are in various delicate shades, with small, indistinct figures, and they are pale blue, pink, cream, green or other tint, which is perfectly matched in the ribbons. From these the busy fingers are fashioning corset covers to be worn under the sheer shirt waists of organdie and batiste which will be included in this same modish young woman's summer cutfit. The little slips are cut in three pieces, with seams only under the arms. They are trimmed all around the upper and lower edges and up the front with a narrow beading, finished with an equally parrow lace edge. Through the beading the ribbon runs, and by it they are drawn into a full and pretty The woman in the chiffon vest smiled fit. Soon after the inauguration of Grover Cleveland, when it became evident that instead of prosperity the Democratic administration had brought adversity, the Republican press promised a different condition if the friends of protection ever again placed a working majority in congress and the right man in the White House. That was four years ago. At no time since those dark days of financial depression has the Republican party allowed that promise to be taken from before the people. Every Republican convention in every county of the country has reiterated that promise and expressed the belief that it would be fulfilled. It was made the chief plank in he platform upon which Mr. McKinley stood when he was nominated, and it was fitting indeed that the plank be transferred and made the principal part of the national platform. Throughout the campaign the promise was prominent. It was the leading issue.

After the victory was known, the people expected a speedy realization of their hopes. They were not disappointed. TRENTON, Oct. 28 .- [Special] -The affairs of Frank A. Magowan, once mayor of Trenton, have once more come to the attention of the public.

He is out of his house at last. The ex-mayor had not yet arisen yesterday morning when three constables from the sheriff's office rang the bell of his house, and, armed with the writ of assistance from the court of chancery, proceeded to eject the inmates. Mr. Magowan refused to get out of bed, and the constables had to use force to get him downstairs. He still declined to leave the house, and more force had to be used to get him out.

The portly form of the ex-mayor was clad only in his nightrobes, and as he reached the door of his mansion the constables handed him the clothes which they had found in his bedroom. With these on his arm, Mr. Magowan walked down to his barn, where he performed his morning toilet.

Meanwhile Mrs. Barnes Magowan had left the house by another door, and while her husband was on the way to the barn, she walked unaccompanied down Monmouth street. Magowan remained in the barn for about an hour, when he went to consult his counsel. TRAINING FOR KLONDIKE.

A Man Versed In Hygiene Gives Prospec-

tive Miners Advice. In the Klondike country the argonaut from this climate will have to be specially equipped physically to stand the rigors of an arctic winter and the hard-

ships of possible hunger. A course of training may be necessary for the astute young man who has never been farther northwest than Chicago.

For those who contemplate making the trip to round up all the gold dust that lies concealed under the arctic circle a man versed in hygiene suggests the following rules of conduct:

Ride on the front seat of the grip car

Eschew overcoats and underclothing. Spend two hours a day in the "zero" room of a cold storage warehouse.

Keep your head cool. If you play cards at all, confine yourself to freeze out.

If married, ask your wife to let you build the fires on January mornings.

If single, send your sweetheart a cookbook and call the next evening. Your reception will be of a temperature low enough to inure you to most any climate.

Give your friends a cold stare when they greet you.

As you will have to pack your grub from Juneau to Dawson, you will need some muscle. Ask the janitor of your building to call on you when he wants coal carried up to the top flat.

Bathe in water in which ice is floating. It calms the nerves.

Rock the baby to sleep each night in the cradle. The exercise will accustom you to the work you expect to do in your mine.

Partake sparingly of the following menu once every day:

Snowflake muffins. Cutlets of dog. More ice. Lard frappe. Tallow a la mode.

Some more ice. Frosted pine cones. Fricassee of icicle. Chipped iceberg.

Sperm candle chilled. Glacier puffs.

After a month of this diet two more months should be spent in fasting. If at the end of that time you still yearn for sudden wealth, you will be in condition to go, barring, of course, accidents and sickness. — Chicago Inter Ocean.

In a tomb owned by Jonathan Reed in Evergreens cemetery a life size portrait of his wife, who died three years ago, is to be hung. She Killed a Host of Rattlers.

Miss Bella T. Hope, the "rattlesnake belle of the Alleghanies," with three young lady companions and two young men went to pick berries in the mountains the other day. At noon, while eating luncheon, they witnessed a desperate fight, a few hundred feet distant, between a wild cat and a rattlesnake. After a few minutes of fighting the cat went at the snake with teeth and claws and literally tore it into shreds. A moment later, from out of every crevice in the surrounding rocks, other rattlers began to crawl, until the ground seemed perfectly alive with them. Two of the ladies fainted, while the men decided to take French leave. Not so with Miss Hope. Hastening nearer, she took deliberate aim through the brush and fired, with the first shot laying low the cat and a couple of snakes. Then, coming from her hiding place, accompanied by the young men, they began a fusillade on the snakes, with the result that in 25 minutes uot a live snake was to be seen, but the ground was strewn with dead reptiles. When it was deemed safe to venture near, a count was made, and 47 rattlers, in size from 4 to 5 feet 6 inches in length, were found, together with the dead catamount. - Exchange.

PORTRAIT IN A TOMB.

A Grieving Husband Tries to Make It Cheerful.

In a tomb owned by Jonathan Reed in Evergreens cemetery a life size portrait of his wife, who died three years ago, is to be hung. Since his wife's lives in Williamsburg, N. Y., has visited the cemetery every day and made the interior of the vault look like the parlor of a dwelling. Curtains are draped about the building, and a live squirrel and a canary bird occupy cages in the vault. There is a clock on a mantel. Mrs. Reed's body is in a glass coffin in a hermetically sealed iron box. There is another coffin, intended for Mr. Reed's body. Some time ago he decided to have a portrait of his wife put in the tomb. Underneath the picture, which will be hung in the back of the tomb, will be the following in-

scription: 'Let those who seek not knowledge pass by this tomb, but those who fain would learn the secret of life in death descend."

"Seven thousand people have come to see me at this tomb already," said Mr. Reed the other day. "I had 70 priests one day come in a body. Twenty-two people came from England, 6 from Germany and 6 from Jerusalem. I don't come here to sit with downcast face and mourn over my dead. I come to be uplifted and show to the world that there is at least one man who is ready to show undying devotion to the only woman that he ever loved."-New York Sun.

She Killed a Host of Rattlers.

Miss Bella T. Hope, the "rattlesnake belle of the Alleghanies," with three young lady companions and two young men went to pick berries in the mountains the other day. At noon, while eating luncheon, they witnessed a desperate fight, a few hundred feet distant, between a wild cat and a rattlesnake. After a few minutes of fighting the cat went at the snake with teeth and claws and literally tore it into shreds. A moment later, from out of every crevice in the surrounding rocks, other rattlers began to crawl, until the ground seemed perfectly alive with them. Two of the ladies fainted, while the men decided to take French leave. Not so with Miss Hope. Hastening nearer, she took deliberate aim through the brush and fired, with the first shot laying low the cat and a couple of snakes. Then, coming from her hiding place, accompanied by the young men, they began a fusillade on the snakes, with the result that in 25 minutes uot a live snake was to be seen, but the ground was strewn with dead reptiles. When it was deemed safe to venture near, a count was made, and 47 rattlers, in size from 4 to 5 feet 6 inches in length, were found, together with the dead catamount. - Exchange.

Hoefgen, of the street car company, took a trip over the line. In speaking of their visit to the city Mr. Speaker CAN'T PLAY WITHOUT PRACTICE

"Over a year ago the old street car company made a contract with the commissioners to make extensive improvements in the road between this place and Wellsville. Although part of the work has been done, the entire contract has not been lived up to, and the time to do the work has expired. We are trying to enter into another agreement, when the road will be widened, the tracks raised and improved. If such an agreement can be made between the railroad company and the county officials the matter will rest for the present, and then if the agreement is not lived up to I suppose we will have to go to war."

Manager Hoefgen was next seen, and said: "You can say that the people in this vicinity will see some wonderful changes in the road within a short time. Enough money has been received, and I expect to have the work done within as short a time as possible. I am unable to give a complete outline of all that will be done, but we will do all that we say, and you can depend upon it."

THE BIG SHOOT.

Many Marksmen Are Enjoying the Day at Rock Spring.

The shoot of the gun club at Rock Spring today attracted a number of people from the city and good shots from Pennsylvania, West Virginia and nearby towns in Ohio.

The scores made this morning were good, and there was some enthusiasm this afternoon.

Two gun squads were entered in each event. The first 10 birds were won by Alexander; second, Foutts; third, "No. 7;" fourth, Welsh; fifth, Johnson; sixth, "No. 7;" ninth, Welsh; tenth, "No. 7;" eleventh, McCoy; twelfth, McCoy.

Tomorrow 500 live birds will be used, and a number of Pittsburg shots will be present.

Summer Cozy Corners.

Summer cozy corners are far more artistic than winter ones (if one's purse is rials and the quaint furniture to be bought are enough to tempt the most economical of women.

One delightful "nook" is sufficiently inviting to bear description. Bamboo posts form the foundation, to which is fastened a roof of Japanese matting. The back and sides are also inclosed with matting decorated with quaint oriental novelties. A long seat, covered with grass linen fabric, is filled with pillows, and near one end is placed a beautiful palm. Oriental cotton stuffs form the festooned draperies, one strip being of cream and white, while the other is of black and Turkish red. Several old lanterns give a soft and restful light, and a tiny table stands near for holding one's favorite books.

The Deerfield Society. The statement that a new society is organized every day by women is not extravagant. In the historic old town of Deerfield, Mass., there has been established the Deerfield Society of Blue and White Needlework. This society's object is twofold. It is not only artistic, but practical. Its first desire is to promote village industry, the second to reproduce and adapt to modern uses the relics of the art practiced by our grandmothers in colonial and revolutionary days, and which, after having attained a high degree of merit both in originality of design and needlecraft, has practically fallen into disuse. The effort of the Deerfield society is to produce as beautiful needlework as that wrought by the first colonial dames. The Deerfield society has chosen for its coat of arms a spinning wheel, with the

MONARCHS WILL

The Last Few Trials Have Been Complete Failures:- There Is Good Material In Town and a First Class Team Could Easily Be Formed.

The Monarchs failed to meet last evening, and unless more interest is taken by the members there is a possibility that the eleven will disband. The last two practice nights but three members have appeared, and as football cannot be played without some practice, the manager of the team is almost ready to give up in disgust.

There is good material in this city for a Rugby team, and if they would spend more time in practice, there is no reason why they should not defeat two-thirds

of the teams they meet. The Nassau eleven, of Pittsburg, is booked for next Tuesday, but unless more people show up for practice the remainder of the week the game will be cancelled.

HER LOVE WAS LASTING.

Though She Could Not Win His Affection He Will Get Her Money.

Miss Mary Metz is a spinster of St. Louis. Years ago she fell in love with George W. Matthews, the son of a neighbor. He had only friendly feelings for her, and she concealed her love until the young man in 1857 announced that he intended to join the regular army and be stationed in Utah on account of his health. Miss Metz did not like to see her lover go, and she appealed to his mother, frankly saying that love dictated her course. The young man persisted, however, and went to Utah.

When the civil war broke out, the young soldier had so much improved in health that he went to the front and fought for two years.

He was then seriously wounded and was returned to a hospital in St. Louis, where he was nursed for several months by his mother and Miss Metz. Her devotion and care, however, did not win his love, and in 1870 he went to Iowa, where he bought a hotel. He has lived in Iowa ever since and has married an estimable lady and raised a family of

children. A few months ago he received a letter from Miss Metz asking him to come to see her. He did not answer the letter and a few weeks later received auother similar request. The letter contained the information that the writer was seriously ill.

Mr. Matthews replied to the second letter, saying that it would not be best for the two to meet again, that their association had resulted in sorrow for both of them and that it was best to let the past be past. In reply Miss Meta wrote that she had no intention of digging up old events, but that her property, which amounted to about \$150, 000, was being grossly mismanaged, that she was being swindled and that she wanted to turn the management of her estate over to Mr. Matthews, whom she felt that she could trust. She further said that she realized that her stay on earth would be short, as the malady from which she was suffering was incurable. She said that all she wanted was to be cared for as long as she lived, and that she desired to leave the bal-

ance of her property to Mr. Matthews. In response to her earnest plea Mr. Matthews went to St. Louis to see his old sweetheart and resolved to comply with her wishes. As a reward for his regard for the woman who loved him for years he will receive a handsome legacy and will be able to leave all his children wealthy .- Exchange.

THE COMMISSIONERS

Came to Town at Noon Accompanied by Prosecutor Speaker.

Prosecutor Speaker and the county and in company with Manager J. B. Hoefgen, of the street car company, took a trip over the line. In speaking of their visit to the city Mr. Speaker CAN'T PLAY WITHOUT PRACTICE

"Over a year ago the old street car company made a contract with the commissioners to make extensive improvements in the road between this place and Wellsville. Although part of the work has been done, the entire contract has not been lived up to, and the time to do the work has expired. We are trying to enter into another agreement, when the road will be widened, the tracks raised and improved. If such an agreement can be made between the railroad company and the county officials the matter will rest for the present, and then if the agreement is not lived up to I suppose we will have to go to war.'

Manager Hoefgen was next seen, and said: "You can say that the people in this vicinity will see some wonderful changes in the road within a short time. Enough money has been received, and I expect to have the work done within as short a time as possible. I am unable to give a complete outline of all that will be done, but we will do all that we say, and you can depend upon it."

THE BIG SHOOT.

Many Marksmen Are Enjoying the Day at Rock Spring.

The shoot of the gun club at Rock Spring today attracted a number of people from the city and good shots from Pennsylvania, West Virginia and nearby towns in Ohio.

The scores made this morning were good, and there was some enthusiasm this afternoon.

Two gun squads were entered in each event. The first 10 birds were won by Alexander; second, Foutts; third, "No. 7;" fourth, Welsh; fifth, Johnson; sixth, Alexander; seventh, Brothers; eighth, "No. 7;" ninth, Welsh; tenth, "No. 7;" eleventh, McCoy; twelfth, McCoy.

Tomorrow 500 live birds will be used, and a number of Pittsburg shots will be present.

Summer Cozy Corners.

Summer cozy corners are far more artistic than winter ones (if one's purse is only of moderate proportions), and the cool and useful colors, the airy materials and the quaint furniture to be bought are enough to tempt the most economical of women.

One delightful "nook" is sufficiently inviting to bear description. Bamboo posts form the foundation, to which is fastened a roof of Japanese matting. The back and sides are also inclosed with matting decorated with quaint oriental novelties. A long seat, covered with grass linen fabric, is filled with pillows, and near one end is placed a beautiful palm. Oriental cotton stuffs form the festooned draperies, one strip being of cream and white, while the other is of black and Turkish red. Several old lanterns give a soft and restful light, and a tiny table stands near for holding one's favorite books.

The Deerfield Society.

The statement that a new society is organized every day by women is not extravagant. In the historic old town of Deerfield, Mass., there has been established the Deerfield Society of Blue and White Needlework. This society's object is twofold. It is not only artistic, but practical. Its first desire is to promote village industry, the second to reproduce and adapt to modern uses the relics of the art practiced by our grandmothers in colonial and revolutionary days, and which, after having attained a high degree of merit both in originality of design and needlecraft, has practically fallen into disuse. The effort of the Deerfield society is to produce as beautiful needlework as that wrought by the first colonial dames. The Deerfield society has chosen for its coat of arms a spinning wheel, with the

commissioners were in the city today, If Players Do Not Manifest More Interest.

The Last Few Trials Have Been Complete Failures: - There Is Good Material In Town and a First Class Team Could Easily Be Formed.

The Monarchs failed to meet last evening, and unless more interest is taken by the members there is a possibility that the eleven will disband. The last two practice nights but three members have appeared, and as football cannot be played without some practice, the manager of the team is almost ready to give up in disgust.

There is good material in this city for a Rugby team, and if they would spend more time in practice, there is no reason why they should not defeat two-thirds of the teams they meet.

The Nassau eleven, of Pittsburg, is booked for next Tuesday, but unless more people show up for practice the remainder of the week the game will be cancelled.

HER LOVE WAS LASTING.

Though She Could Not Win His Affection He Will Get Her Money.

Miss Mary Metz is a spinster of St. Louis. Years ago she fell in love with George W. Matthews, the son of a neighbor. He had only friendly feelings for her, and she concealed her love until the young man in 1857 announced that he intended to join the regular army and be stationed in Utah on account of his health. Miss Metz did not like to see her lover go, and she appealed to his mother, frankly saying that love dictated her course. The young man persisted, however, and went to Utah,

When the civil war broke out, the young soldier had so much improved in health that he went to the front and fought for two years.

He was then seriously wounded and was returned to a hospital in St. Louis, where he was nursed for several months by his mother and Miss Metz. Her devotion and care, however, did not win his love, and in 1870 he went to Iowa, where he bought a hotel. He has lived in Iowa ever since and has married an estimable lady and raised a family of

A few months ago he received a letter from Miss Metz asking him to come to see her. He did not answer the letter and a few weeks later received auother similar request. The letter contained the information that the writer was seriously ill.

Mr. Matthews replied to the second letter, saying that it would not be best for the two to meet again, that their association had resulted in sorrow for both of them and that it was best to let the past be past. In reply Miss Metz wrote that she had no intention of digging up old events, but that her prop. erty, which amounted to about \$150,-000, was being grossly mismanaged, that she was being swindled and that she wanted to turn the management of her estate over to Mr. Matthews, whom she felt that she could trust. She further said that she realized that her stay on earth would be short, as the malady from which she was suffering was incurable. She said that all she wanted was to be cared for as long as she lived, and that she desired to leave the balance of her property to Mr. Matthews.

In response to her earnest plea Mr. Matthews went to St. Louis to see his old sweetheart and resolved to comply with her wishes. As a reward for his regard for the woman who loved him for years he will receive a handsome legacy and will be able to leave all his children wealthy .- Exchange.

Embroidery Among the Lords.

A curious little incident happened in the house of lords recently. In the peeresses' gallery a lady quietly took her seat and produced a piece of unfinished needlework embroidery. This she proceeded with great complacency to deftly and, as far as an inexpert male observer can vouch, to artistically operate upon. The sight was one to immensely scandalize old fashioned parliamentarians, but no one, not even the most grave and venerable of the officials -and there are many grave and venerable officials in the upper house-ventured to interfere with the audacious

Life of Susan B. Anthony.

Mrs. Ida A. Harper is assisting Miss Susan B. Anthony in the preparation for publication of Miss Anthony's biography. The work is in daily progress at the home of "Aunt Susan," 17 Madison street, Rochester, and the two women are working faithfully over an immense undertaking. All day long they work together uninterruptedly, and the book is to have between 50 and 60 chapters. It is to be the only authentic biography of Miss Anthony's busy, ambitious and eventful career, and when it is completed all the old papers are to be destroyed. It will be one of the few biographies if not the only biography of a famous woman written while the per-

Klondyke

The Land of Golden Nuggets.

JOSEPH LADUE,

the new Bonanza King of the Klondyke Gold Regions, gives the facts. His book reads like "The Arabian Nights," BUT Joseph Ladue KNOWS whereof he writes. He was the first man on the spot when the first gold was discovered last August, 1896. He located one rich claim and immediately purchased welve others at a low price before their value was known. He has refused \$100,000 for any ONE of these claims, as they are rich with virgin gold nuggets, beyond the dream of avarice. Joseph Ladue then

Established Dawson City

at the mouth of the Klondyke and Yukon Rivers, by erecting the first house in the region in September, one month after the gold was first discovered. He bought 178 acres from the government on the city site where his town lots 150x50 are now selling for \$5,000 each.

Mr. Ladue was fortunate enough to be successful in his trading post investments to have on hand ample capital to carry out his plans, and there is no man living who is better posted on Alaska and the great North West Territories than Mr. Joseph Ladue. He has just returned from that country to his old home in Schuler Falls, N. Y., where he passed a large portion of his boyhood and early manhood. Mr. Ladue left his home nearly twenty years ago to seek his fortune in the west going first to the Black Hills, where he was successful in gold mining, thence to Arizona and the Pacific coast and finally located in Alaska and the northwest, where he has covered almost the entire country since 1882. Mr. Ladue is a typical pioneer: strong, hardy and resolute—a man of iron as one must needs be to go through the hardships he has and come out with a constitution unbroken and unimpared at about the age of 43. Mr. Ladue has not only worked his muscles to good advantage to himself with the result of an abundance of the world's goods, far beyond the dreams of men, but he has evidently all this time been closely observing the conditions of that strange country-the Yukon Vallev-which has so suddenly become one of the great centers upon which human interest throughout the world is focussed.

When the wonderful stories began to come down from the Yukon country it was naturally concluded that it was at least half exaggeration. such amount of gold could be taken in so short a time from a country like that under the most most unfavorable conditions was held to be incredible. But L. F. LOREE, when the great bags of virgin gold began to be poured out upon mint counters in San Francisco under the eyes of the whole world (for modern journalism does this, annihilating time and space) people began to wonder and the wonder grew day by day as the real facts were disclosed, and now people who are well informed as to the facts declare that half the truth has not been golden treasures of the Yukon Valley.

As we have already said, there is no man today alive who knows more about this wonderful country than does Mr. Ladue. What makes his talk of it specially interesting and reliable is the fact that his knowledge of it is practical. It has not been gained from hearsay nor from desultory visits made now and then at certain favorable seasons of the year, but from steady living there through the long summer days and the long winter nights, year in and year out for 15 years, where he now owns the best mining claims on the Klondyke and its tributaries.

Iu presenting his book to the public we do so knowing that it is by an authority on the subject of which he writes. His first work entitled

Planting herself in the middle of the street she picked up a large stone and threw it against city hall, remarking at the time, "I'll learn you to call me Mandy, you big devil." She then fled out Third

Clerk Hanley was the first person to reach the front of the building, and he picked up the stone which she had thrown. The painters stopped work to ascertain the cause of the disturbance, but all were at a loss to know who the woman was addressing and for whose benefit the stone was thrown.

Life of Susan B. Anthony.

Mrs. Ida A. Harper is assisting Miss Susan B. Anthony in the preparation for publication of Miss Anthony's biography. The work is in daily progress at the home of "Aunt Susan," 17 Madison street, Rochester, and the two women are working faithfully over an immense undertaking. All day long they work together uninterruptedly, and the book

is to have between 50 and 60 chapters. It is to be the only authentic biography of Miss Anthony's busy, ambitious and eventful career, and when it is completed all the old papers are to be destroyed. It will be one of the few biographies if not the only biography of a famous woman written while the per-

son is yet living. Miss Anthony looks back over 77 years of a busy, well fought life, and her reminiscences are exceedingly in-

The biography will go to press in the fall and will be in the form of two royal octavo volumes, each containing 400 pages. Its title will be "The Life and Work of Susan B. Anthony." The book is to be sold entirely by subscription, and the price is to be \$5.

TZIONATIZE Klondyke

The Land of Golden Nuggets.

JOSEPH LADUE,

the new Bonanza King of the Klondyke Gold Regions, gives the facts. His book reads like "The Arabian Nights," BUT Joseph Ladue KNOWS whereof he writes. He was the first man on the spot when the first gold was discovered last August, 1896. He located one rich claim and immediately purchased welve others at a low price before their value was known. He has refused \$100,000 for any ONE of these claims, as they are rich with virgin gold nuggets, beyond the dream of avarice. Joseph Ladue then

Established Dawson City

at the mouth of the Klondyke and Yukon Rivers, by erecting the first house in the region in September, one month after the gold was first discovered. He bought 178 acres from the government on the city site where his town lots 150x50 are now selling for \$5,000 each.

Mr. Ladue was fortunate enough to be successful in his trading post investments to have on hand ample capital to carry out his plans, and there is no man living who is better posted on Alaska and the great North West Territories than Mr. Joseph Ladue. He has just returned from that country to his old home in Schuler Falls, N. Y., where he passed a large portion of his boyhood and early manhood. Mr. Ladue left his home nearly twenty years ago to seek his fortune in the west going first to the Black Hills, where he was successful in gold mining, thence to Arizona and the Pacific coast and finally located in Alaska and the northwest, where he has covered almost the entire country since 1882. Mr. Ladue is a typical pioneer: strong, hardy and resolute—a man of iron as one must needs be to go through the hardships he has and come out with a constitution unbroken and unimpared at about the age of 43. Mr. Ladue has not only worked his muscles to good advantage to himself with the result of an abundance of the world's goods, far beyond the dreams of men, but he has evidently all this time been closely observing the conditions of that strange country-the Yukon Vallev-which has so suddenly become one of the great centers upon which human interest throughout the world is focussed.

When the wonderful stories began to come down from the Yukon country it was naturally concluded that it was at least half exaggeration. That any such amount of gold could be taken in so short a time from a country like that under the most most unfavorable conditions was held to be incredible. But L. F. LOREE, when the great bags of virgin gold began to be poured out upon mint counters in San Francisco under the eyes of the whole world (for modern journalism does this, annihilating time and space) people began to wonder and the wonder grew day by day as the real facts were disclosed, and now people who are well informed as to the facts declare that half the truth has not been golden treasures of the Yukon Valley.

As we have already said, there is no man today alive who knows more about this wonderful country than does Mr. Ladue. What makes his talk of it specially interesting and reliable is the fact that his knowledge of it is practical. It has not been gained from hearsay nor from desultory visits made now and then at certain favorable seasons of the year, but from steady living there through the long summer days and the long winter nights, year in and year out for 15 years, where he now owns the best mining claims on the Klondyke and

BICYCLE IN POLITICS.

Candidate Who Improved the Streets Asks Brooklyn Votes.

Chairman Quigg Gives Out a Statement, the Result, He Says, of Repeated Canvasses-Bryan Not Likely to Take a Hand-Sickles For Tracy.

NEW YORK, Oct. 28.-Rev. Edward McGlynn, whose advocacy of Henry George's theories brought him into conflict with Archbishop Corrigan in 1886, is a frequent visitor at George head-

Dr. McGlynn says there is no clash between the Catholic church and Henry George's theories.

As was to be expected, the bicycle has appeared as a factor in the campaign. Theodore B. Willis, at present commissioner of works of the city of Brooklyn, is a candidate for the office of register of the borough of Brooklyn. In his interest there is published a statement of the street improvements made in the years of Mr. Willis'incumbency of the commissionership, and the amount of money—a very large sum—expended therefor. The statement concludes with an exhortation to bicycleists to vote for whom has done so much for their convenience and pleasure.

Following a long caucus of Republican district leaders President Qu'gg of the Republican committee gave out a statement in part as follows:

"Repeated canvasses show that Tracy's strength is growing and that Low's support, which has never been large, becomes smaller every day. There are only two assembly districts in New York city in which Mr. Low will have any substantial Republican support. These are the Twenty-seventh and the Twenty-ninth. In those districts, they being the districts out of which practically the whole of the Low vote will be drawn, the net effect of Mr. Low's candidacy will be to increase the majorities of the Repub ican party over Van Wyck. Low's vote will be smaller than Van Wyck's in each district. We shall carry New York for Tracy by just about the plurality over Van Wyck which was obtained by Governor Black last year over Porter. The plurality for Tracy over Van Wyck will be greater in Brooklyn than in New York, and is likely to reach 40,. 000. Low's vote will leave the two great parties, as to comparative strength, in just about their normal conditions, but George's vote will so reduce Van Wyck's as to give us for Tracy a first rate plurality."

General Daniel E. Sickles has announced that he will vote and work for General Tracy and the whole Republi-

can ticket.

Speeches at midday and speeches at night with argument and quiet work at all times is the program for the week of the half score parties contesting for the honors in the election that is to be held in Greater New York on Tuesday next. The message said to have been sent by the Georgeite leaders to W. J. Bryan to give the weight of his influence and eloquence in aid of the Jeffersonian nominee is regarded as a partial admission that their cause is not in as hopeful condition as those leaders have represented it to be. The time is so short that it is scarcely to be expected that Mr. Bryan will be induced to re-

As stout a claim as has been made for the Republican ticket is that put forth by General Tracy, the nominee for mayor. He asserts that there are in Greater New York 230,000 people ho vote the Republican ticket year in and year out; that Low is the only one of the candidates who will draw at all from the Republican vote and that he cannot take away more than 8 per cent of the regular Republican vote, which would leave, in round figures, 210,000 votes for Tracy, while whoever receives as many as 175,000 of the 100,000 ballots that are likely to be cast is morally certain of election.

The betting, which continues light, shows no material change of heart on the part of those who put their money on the result of Tuesday's election. Van Wyck, Tammany Democrat, continues the favorite, with Tracy, Republican, second Low, Citizens' Union, third. Some Republican money is offered on even terms.

Jacob Wortn, the deposed leader of the Brooklyn Republican organization, emerged from the seclusion in which he has been enveloped the last fortnight, and predicted the defeat of General Tracy.

The Citizens' Union has issued a statement, which contained a remarkble charge, "that the Republican organization has sent out orders to its members to shout for Tracy and vote for Van Wyck.

This report was confirmed by a prominent member of Tammany, who stated that Van Wyck expects to get about 35,000 Republican votes.

HARRISON INVADES NEW YORK.

A Hot Fight to Be Made on George by

Chicago Democrats. NEW YORK, Oct. 28 .- Mayor Harrison, accompanied by his cabinet, a brass band and nearly 300 broadshouldered members of the Cook County Democracy, have arrived here for a three days' stumping tour of the

Greater New York. Leaders of the party claim the fight will be exclusively against Henry George. Chicago Democrats, they claim, have a good deep grudge against the single tax advocate. In 1894 Mr. George made several speches there for John E. White, who was running for congress in the Second district on the Populist ticket. The election resulted

in the defeat or John J. Hanrahan, the Democratic nominee, and the election of Billy Lorimer, Republican.

CIGARET, CAUSED A FIRE.

DR. M'GLYNN AGAIN AIDS GEORGE. Dropped by a Clerk In St. Louis-Loss \$900,000.

> St. Louis, Oct. 28.-A lighted cigaret dropped by a thoughtless clerk is supposed to have caused the fire which practically gutted the white stone building at the corner of Seventh and Chestnut streets, occupied by the general offices of the Wabash railroad. Seven young women saved their lives by coming from the fourth floor on a fireescape. A. R. Field was struck by flying debris and probably ratally hurt.

The fire came so suddenly that the Wabash company was prevented from saving anything. Every record in the office of the chief engineer, rights of way, real estate deeds and surveys of every description were destroyed. An officer of the company estimates their loss at \$500,000. Real estate men place the valuation of the building at \$400,000.

Edison's New Iron Process.

NEW YORK, Oct. 28.—The Electrical Engineer publishes today the first authoritative account of Thomas A. Edison's success in recovering by electrical means the iron contained in low grade ore. His process consists of pulverizing the ore. The powder is then allowed to fall in close proximity to electro magnets, which deflects the iron ors to one side and the non-metallic matter falls to the other side by grav-

Fifty-Four Killed In a Panic.

St. Petersburg, Oct. 28.-At the village of Khnieleff, in the Kozloff district, on the western coast of Crimea, while service was in progress in the village church an alarm of fire was raised. A panic ensued. Fifty-four persons were killed.

A Buffalo Elevator Burned.

BUFFALO, Oct. 28.—The Sturgis elevator has been totally destroyed by fire. Loss, \$206,000; partially insured. For the Slender Girl.

If the too stout woman endures torture, the too slender one suffers no less. Visions of the bean pole and horrid descriptions of the attenuated maiden flit through her mind as her glass tells her how poorly she carries off the full skirts of the summer.

But there is a skirt designed specially for her which makes her a better figure than she could ever hope to have. It is godet in the back, rather tight fitting on the hips, but furnished with an immense box plait in the front. It is laid flat at the belt and is allowed to flare only around the foot. The box plait may be lined with black taffeta, which shows, as the folds shake out in walking, like a fan.

The waist worn with this must be a blouse, finished with a ruffle to give fullness at the hips.

The crinkled goods of the summer make a very nice box plaited skirt, and there is nothing as nice for trimming them as the small needlework yoke and ruffles that come for the purpose. -St Louis Globe-Democrat.

BICYCLE IN POLITICS.

Candidate Who Improved the Streets Asks Brooklyn Votes.

DR. M'GLYNN AGAIN AIDS GEORGE.

Chairman Quigg Gives Out a Statement, the Result, He Says, of Repeated Canvasses-Bryan Not Likely to Take a Hand-Sickles For Tracy.

NEW YORK, Oct. 28.-Rev. Edward McGlynn, whose advocacy of Henry George's theories brought him into conflict with Archbishop Corrigan in 1886, is a frequent visitor at George head-

Dr. McGlynn says there is no clash between the Catholic church and Henry George's theories.

As was to be expected, the bicycle has appeared as a factor in the campaign. Theodore B. Willis, at present commissioner of works of the city of Brooklyn, is a candidate for the office of register of the borough of Brooklyn. In his interest there is published a statement of the street improvements made in the years of Mr. Willis'incumbency of the commissionership, and the amount of money-a very large sumexpended therefor. The statement concludes with an exhortation to bicycleists to vote for whom has done so much for their convenience and pleasure.

Following a long caucus of Republican district leaders President Qu'gg of the Republican committee gave out a statement in part as follows

"Repeated canvasses show Tracy's strength is growing and that Low's support, which has never been large, becomes smaller every day. There are only two assembly districts in New York city in which Mr. Low will have any substantial Republican support. These are the Twenty-seventh and the Twenty-ninth. In those districts, they being the districts out of which practically the whole of the Low vote will be drawn, the net effect of Mr. Low's candidacy will be to increase the majorities of the Repub ican party over Van Wyck. Low's vote will be smaller than Van Wyck's in each district. We shall carry New York for Tracy by just about the plurality over Van Wyck which was obtained by Governor Black last year over Porter. The plurality for Tracy over Van Wyck will be greater in Brooklyn than in New York, and is likely to reach 40,-000. Low's vote will leave the two great parties, as to comparative strength, in just about their normal conditions, but George's vote will so reduce Van Wyck's as to give us for Tracy a first rate plurality.

General Daniel E. Sickles has announced that he will vote and work for General Tracy and the whole Republican ticket.

Speeches at midday and speeches at with argument and quiet work at all times is the program for the week of the half score parties contesting for the honors in the election that is to be held in Greater New York on Tuesday next. The message said to have been sent by the Georgeite leaders to W. J. Bryan to give the weight of his influence and eloquence in aid of the Jeffersonian nominee is regarded as a partial admission that their cause is not in as hopeful condition as those leaders have represented it to be. The time is so short that it is scarcely to be expected that Mr. Bryan will be induced to respond.

As stout a claim as has been made for the Republican ticket is that put forth by General Tracy, the nominee for mayor. He asserts that there are in Greater New York 2:0,000 people ho vote the Republican ticket year in and year out; that Low is the only one of the candidates who will draw at all from the Republican vote and that he cannot take away more than 8 per cent of the regular Republican vote, which would leave, in round figures, 210,000 votes for Tracy, while whoever receives as many as 175,000 of the 700,000 ballots that are likely to be cast is morally certain of election.

The betting, which continues light, shows no material change of heart on the part of those who put their money on the result of Tuesday's election. Van Wyck, Tammany Democrat, continues the favorite, with Tracy, Republican, second Low, Citizens' Union, third. Some Republican money is

offered on even terms. Jacob Worth, the deposed leader of the Brooklyn Republican organization, emerged from the seclusion in which matter falls to the other side by gravhe has been enveloped the last fortnight, and predicted the defeat of General Tracy.

The Citizens' Union has issued a statement, which contained a remarkble charge, "that the Republican organization has sent out orders to its members to shout for Tracy and vote for Van Wyck.'

This report was confirmed by a prominent member of Tammany, who stated as to his sanity. that Van Wyck expects to get about 35,000 Republican votes.

HARRISON INVADES NEW YORK.

A Hot Fight to Be Made on George by Chicago Democrats.

NEW YORK, Oct. 28 .- Mayor Harrison, accompanied by his cabinet, a brass band and nearly 300 broadshouldered members of the Cook County Democracy, have arrived here for a three days' stumping tour of the Greater New York.

Leaders of the party claim the fight will be exclusively against Henry George. Chicago Democrats, they claim, have a good deep grudge against the single tax advocate. In 1894 Mr. George made several speches there for John E. White, who was running for in the defeat or John J. Hanrahan, the Democratic nominee, and the election of Billy Lorimer, Republican.

CIGARET, CAUSED A FIRE.

Dropped by a Clerk In St. Louis-Loss \$900,000.

St. Louis, Oct. 28.-A lighted cigaret dropped by a thoughtless clerk is supposed to have caused the fire which practically gutted the white stone building at the corner of Seventh and Chestnut streets, occupied by the general offices of the Wabash railroad. Seven young women saved their lives by coming from the fourth floor on a fireescape. A. R. Field was struck by flying debris and probably ratally hurt.

The fire came so saddenly that the Wabash company was prevented from saving anything. Every record in the office of the chief engineer, rights of way, real estate deeds and surveys of every description were destroyed. An officer of the company estimates their loss at \$500,000. Real estate men place the valuation of the building at \$400,000.

MAY BE BEATEN TO DEATH.

A Chicago Woman's Theory of Why Her Husband's Body Was Stolen.

CHICAGO, Oct. 28. - According to Mrs. Louise Humpel, her husband's dead body, which was among five corpses stolen from the county morgue at Dunning a few nights ago, was taken to conceal a crime. She declares it as her belief that he died the same way other unfortunates in the county insane asylum, who it is charged have been mauled to death by attendants.

Her husband was a robust man with no signs of consumption. She says she saw him Saturday afternoon and he was bruised and cut. An attendant would not let her see his face. In his mutterings he told her he had been attacked and beaten, she claims.
